New Jersey Envirothon to Take Place May 8, 2027 at Lake Garrison

Gloucester County, NJ — The 2027 New Jersey Envirothon will give teachers and students an exciting opportunity to put their environmental knowledge into action through engaging hands-on challenges, teamwork, and real-world problem-solving. High school teams from across New Jersey will come together for an inspiring day of environmental education, collaboration, and discovery.

The New Jersey Association of Conservation Districts proudly announces that the 2027 New Jersey Envirothon will take place on Saturday, May 8, 2027, at Lake Garrison in Monroeville, Gloucester County, New Jersey. This highly anticipated annual event will bring together high school teams from throughout the state for an energetic competition featuring hands-on challenges in conservation, natural resources, and sustainability.

The Envirothon is a statewide competition that encourages interest in conservation and stewardship. Teams are tested on soil, aquatic ecology, forestry, wildlife, and current issues, while developing teamwork and leadership through real-world experience.

2027 Theme

Soil Health Management: Agricultural Principles and Stewardship

Soil health principles recognize soil as a living ecosystem and provide a foundation for resilient agriculture and the long-term conservation of natural resources.

New Jersey farmers and agricultural groups are finding practical ways to care for the soil through sustainable farming and conservation. Across the state, producers are making soil health part of their nutrient management and land-conservation efforts, helping keep farms productive and waterways cleaner.

By improving soil structure, reducing erosion, and protecting water quality, New Jersey farmers are helping preserve local ecosystems and the environment. The NJ Envirothon competition will bring focus to these principles and be featured in the competition stations.

About the New Jersey Envirothon

The New Jersey Envirothon is made possible through the support of local conservation districts, state agencies, and sponsors dedicated to fostering the next generation of environmental leaders. The Gloucester Soil Conservation District is honored and excited to serve as this year's host of the New Jersey Envirothon. Gloucester SCD is dedicated to promoting natural resource conservation through education, outreach, and community partnerships.

Scholarships and National Competition

The winning team receives scholarships of $1,000 per student and represents New Jersey at the NCF Envirothon, to be held July 24–30, 2027, at Mount St. Mary's University in Emmitsburg, Maryland, where they will compete with teams from the United States, Canada, Singapore, and China.

How to Get Involved

Teachers, advisors, and students interested in forming teams or learning more about the event can visit www.njenvirothon.org.

Mark your calendars for May 8, 2027, visit www.njenvirothon.org, and join us at Lake Garrison for the New Jersey Envirothon.
